Personnel News

Leave/Compensatory Leave Policy for January 27, 1987

At least three (3) different announcements were aired by the local media concerning CNC operations for January 27, 1987. This in turn resulted in many classified employees reporting for work by about 11:00 AM, while others, who thought they were not to report to work did not report to work. Because of the confusion in communicating the status of the College, it is the decision of the President that those individuals who did not report to work because they did not know they were required to, will not be charged annual leave for that day. On the other hand, those individuals who received the instructions to come to work and did, are not eligible for compensatory time since they were working a part of their normal work day.
