DEANS' ANNOUNCEMENTS

Call for Volunteers

Most of you are familiar in some degree with the IDEA Faculty Evaluation System. This is a system developed by The Center for Faculty Evaluation and Development in Higher Education which, as this name implies, emphasizes faculty development through an evaluation of teaching effectiveness. Two years of consideration of the IDEA system has led only to the conclusion that its value must be measured by some actual experience at CNC. We would like to ask for volunteers to experiment with IDEA evaluation this semester. If you would be willing to use the system, and share your appraisal of its value with the whole faculty, please leave your name with Mrs. Casey, Ext. 7050. If you have questions regarding the system, please see Dean Parks.

LIBRARY NEWS

The New Copyright Law

The "Guidelines for Fair Use Copying" were published in the September 9, 1977, and January 13, 1978, issues of the CNC Chronicle. A copy of the pamphlet Copyright and Educational Media: A Guide to Fair Use and Permissions Procedures, which has been sent to all department heads, also contains the fair use guidelines. Additional copies of these guidelines may be obtained by contacting Nan Eddins or Charles Brownson in the library.

PHYSICAL PLANT

Capital Outlay Status Report

I have attached a chart which represents the current status of all Capital Outlay Projects presently under development. As a reference point, the first floor of Wingfield Hall is 10,000 square feet.

I have also attached a chart indicating the 1978 space requirements of the College as determined by State Council formulae. Much of the planning for capital outlay is a function of these formulae. Notice, for example, that we presently have an excess of classroom space, indicating a need to extend utilization of our facilities into the late afternoon periods before we will be able to justify additional space.

Plans are currently under development which will provide additional classroom space (in spite of the excess above) and seminar rooms. Requests or suggestions for other alterations of academic space should be directed to Dean Edwards. Changes to space will be considered based on pedagogic merit, cost, and the impact on the College's long-range capital outlay plans.

Additional Comments:

1. Estimated dates optimistically assume prompt approval of paperwork by Commonwealth authorities, minimal problems of development and design on campus and with architects, and a trouble-free construction process. Seasoned system watchers understand the viability of such assumptions.

2. The Instructional and Office Building contains:

- a. First Floor: Auditorium, Mechanical area, Art Gallery.
- b. Second Floor: Admissions, Business Office, Registrar.
- c. Third Floor: Faculty Offices, Lounge, Conference Room.
- d. Fourth Floor: President, Deans, Development, Finance, Planning, Board Room, Publications and Public Relations, etc.

3. Plans for the Instructional and Office Building will be in my office for faculty and staff review the week between February 6 and February 10. Comments should be directed to:

- 1st Floor - Dean Wood
- 2nd Floor - Dean Hones, Dean McLoughland, Mrs. Blount
- 3rd Floor - Dean Edwards, Dr. Cones
- 4th Floor - Dean Edwards, Dr. Beal, Dean Hones

The plans will be revised one additional time, based on the comments received by February 10, 1978.

4. The parking lot and entrance road will be located in the northwest corner of the campus and will connect to Warwick Boulevard between the College Court Apartments and the Amoco gas station.

5. A committee will be formed this summer to plan the addition to the Science Building.

6. The addition to the Campus Center will also be planned in detail this summer and next fall. Comments should be directed to Dean Polis.

7. Finally, the plan assumes funding of the Instructional and Office Building. Failure of that assumption will obviously have a dramatic and negative impact on all of the information contained in this report.
