- April 14: COLLEGIUM MUSICUM: Eiji Hashimoto, Harpsichord, Campus Center Ballroom, 4 p.m.
-

FACULTY NEWS

Professor John E. Jenkins served as a member of the Visiting Evaluation Committee of the Southern Association of Colleges and Schools for Harrisonburg High School on March 19-22; and was chairman of the Curriculum sub-committee and a member of the mathematics and school facilities sub-committees.

* * * * *

Dr. Horton H. Hobbs, III will attend the International Crayfish Symposium in Baton Rouge, La. April 7-11. He will present a paper: "Observations on the Cave Dwelling Crayfishes of Indiana".

* * * * *

Dr. Maniyar will be a participant in the program of the Virginia Association of Economists to be held in Richmond, April 18-19. Dr. Maniyar will be a discussant of a paper by Prof. Lawrence S. Moss entitled "Can College Economics Survive Without a First Course in Statistics".

* * * * *

Mr. David King will address the Language Club students at Warwick High School on April 8th. The title of his lecture will be "The Importance of Foreign Languages in the 70's".

* * * * *

DEPARTMENT NEWS

On March 27th the Departments of Modern Foreign Languages of Hampton Institute and Christopher Newport College presented An Evening of Poetry at Dett Auditorium on the Hampton Institute Campus. The program consisted of the recitation of poems by the language students of both colleges. From Christopher Newport, the following five students participated: Mary Elizabeth Krone and Paula Patterson in French; Barbara Ellis and Paul Gargour in French and Spanish; and Frank Brooks in Spanish. The recital, as well as the reception that followed at which the C.N.C. students were guests, provided a magnificent opportunity to congratulate each other on their individual performances and to exchange ideas and impressions on their language experiences. It is planned that next year the event will take place on the C.N.C. Campus.

OF ACADEMIC INTEREST

FACULTY EVALUATION COMMITTEE

Due to the accident incapacitating Dr. JoAnne Squires, Dr. Joyce Sancetta is Chairman pro tem of the Faculty Evaluation Committee.

CURRICULUM COMMITTEE MOTION

At the April Faculty meeting, the Curriculum Committee will bring the following motion to the Faculty's consideration:

"That departments consider 'flexible scheduling patterns' for course offering. These flexible scheduling patterns may include short courses, (2 weeks) 8 week courses, Saturday courses, etc. These courses may be offered when the College's normal means of offering classes cannot meet the academic needs of a significant number of students. All new courses, however, must come to the Curriculum Committee and the Faculty for approval". The Committee unanimously approved this motion.

The Curriculum Committee would appreciate it if each department chairman would submit to us, by April 15, the following:

1. Recommended college wide distribution requirements for your majors.
2. Recommended departmental requirements for your majors.

Any department or instructor who has not submitted topics titles and catalogue-type descriptions for Fall, 1974 topics courses, please get these to us.

CENSUS SURVEY SHOWS EDUCATION MAJOR DROP (From Higher Education and National Affairs, March 29, 1974)

Despite total increases in enrollment between 1966 and 1972 the number of persons majoring in education declined by 111,000 or 9.9% in that period, the Census Bureau reported. Based on survey information, the Census Bureau said, losses of 33% were registered in the same period in the fields of engineering and the physical sciences. On the other hand, the number of social science majors increased in the period by 49%, and the number of commerce and business majors, 30 percent.

Of the nine million students enrolled in colleges and universities in October 1972, the bureau said, 1.3 million (14 percent) were enrolled in business or commerce fields; 1.2 million (13 percent) in education; 1.1 million (12 percent) in social sciences; and 700,000 (8 percent) in health or medical specializations.

Most fields of study are dominated by one sex or the other, the Census Bureau reported. Men represented 57 percent of all college students in 1972 but accounted for 98 percent of engineering majors, 90 percent of agriculture students, and 82 percent of law students. Other fields heavily dominated by men were business and commerce (76 percent), the physical sciences (73 percent), and the biological sciences (64 percent). Women predominated in education specializations (73 percent), and in health fields (58 percent).

The 1972 survey showed there were some 900,000 students 35 years of age or older, 85 percent of them in college. These older students were much more likely to be attending classes on a part-time basis. While those 35 and older constituted only two percent of full-time students, they accounted for about one-fourth of all part-time students.

The study, Social and Economic Characteristics of Students: October 1972, Series P-20, No.260, is \$1.30 from Superintendent of Documents, U.S. Government Printing Office Washington, D.C.20402.

Major Field of Study of College Students 14 to 34 Years Old: October 1966 and October 1972 (Numbers in thousands. Civilian noninstitutional population)
