CHRISTOPHER NEWPORT COLLEGE

FEBRUARY 10, 1983

Adjusting to Budget Cut Won't Be Easy; CNC Curbs Spending

Due to a proposal by The House Appropriations Committee, Christopher Newport College is faced with a 4.8 percent across the board budget cut instead of the six percent cut.

This reduction will add \$67,655 to CNC's \$7.94 million budget. Other colleges will receive additional funds for their budget. William and Mary will receive \$251,180, and Thomas Nelson Community College will add \$92,825 to its \$9.18 million yearly expenses.

by Linda Dozier

For the upcoming 1983-84 budget, Christopher Newport College, which is in a rapid state of growth, is faced with a six percent cut which is a one percent increase over last year. The cut is a part of Governor Charles Robb's budget plan and, it will affect all state agencies.

In a "Memorandum of Understanding" between the Governor and CNC President John Anderson a list of program objectives and operating objectives were agreed upon. In these objectives the college will review its curriculum offerings and monetary allocations.

By June 30, 1984 the college should have completed a review of the curriculum, remedial education, and of administrative support programs. With the completion of the review the college should have reduction recommendations for the above areas.

In an attempt to accommodate the upcoming six percent cut, the College is currently constraining the purchase of supplies and equipment, plus placed stringent controls on many services on campus, such as, media and printing services.

(Continued on p. 8)

Computer Monitors Room Temperatures

by Chantele Bump

Room temperatures at Christopher Newport College are monitored and controlled by the Energy Management Control (EMC) System, also known as a computer. The computer monitors the temperature using special heat sensors that are located throughout the college. The computer controls the temperature by turning air conditioners and heaters on or off whenever needed.

Prior to installation of the computer last August, a timeclock system was used. The timeclocks had to be set almost daily and there were several of them in different places.

The EMC System is much more convenient and timesaving. Each Friday, Jessie Roberts, one of the computer operators, programs the computer around the next week's activities.

Except for the programming on Fridays, the computer runs itself totally, turning boilers on and off as needed. For example, if play rehearsal was scheduled for one Saturday afternoon, the computer would automatically turn on the heat in the theatre.

The EMC System features its own alarm system. If something does not happen that should happen or vice versa, the computer prints out where the problem originates.

The print out would appear on the computer's printer in the Service Building where the system is located or on the printer belonging to the printer.

School of LASE may be reorganized by July 1

by Sue Killam

The School of Liberal Arts, Sciences and Education at Christopher Newport College may be reorganized by July 1, the beginning of the new fiscal year.

Dr. Richard Summerville, vice president for Academic Affairs, presented his recommendation for reorganization to President John Anderson last Friday.

Before making his recommendation, Summerville received counsel from Dr. Robert Durel - acting dean of the School of Liberal Arts, Sciences and Education (LASE), and Dr. Algin King - dean of the School of Business and Economics. Summerville said that King will be affected by reorganizations because the general requirements made of the new deans would also apply to him.

The Student Association Executive Council, the Administrative Review Committee, and the Faculty Advisory Committee also provided Summerville with recommendations.

Summerville declined to discuss his recommendations before the president's decision has been made. He did say, however, that he

agrees with Anderson that the School of LASE needs to be reorganized. Anderson decided last November this is necessary.

Currently, the School of LASE consists of 17 departments. The School of Business and Economics consists of three.

Summerville believes that there needs to be a balance in what is required of the deans.

He said that when CNC established the Schools in 1979 the Board of Visitors seems to have been primarily concerned with creating a school of Business and Economics. The School of LASE appears to be what was left over.

The School of LASE has 78 percent of the CNC students, 85 percent of the departments, 80 percent of the regular faculty, 78 percent of the full-time-equivalent faculty, 90 percent of the non-personal-services budget, and it graduates 63 percent of the graduates.

Summerville was the dean of the School of LASE from 1980 to 1982. He said that to "get us through today" can take up "a full day's agenda." The long-range planning, therefore, is often not done.

Summerville feels that reorganization is necessary for all students and faculty to get

their "fair share of administrative support." He said that adjunct professors, and evening and off-campus students should have "access to and service from the dean's office."

Summerville made his recommendation based on three rules - that the quality of education be the goal of reorganization, that reorganization not cost more money, and that the total number of college administrators not increase.

There is concern "in many parts of campus," said Summerville, that if the school is divided so that there is more than one dean, there will no longer be "one clear voice" to speak "on behalf of a Liberal Arts Education."

This bothers him because it "presumes that commitment to a Liberal Arts education resides" only in the School of LASE. Summerville said that the commitment is college-wide - the distribution requirements insure that students receive a Liberal Arts education. He said that he will be the voice which speaks for a Liberal Arts Education.

Durel, the acting dean of the school, said that some department chairmen think smaller schools will mean the dean has greater control over the chairmen. Durel disagreed. He said that a dean with 17 departments has more power because of the disorganization.

The Faculty Advisory Committee's recommendation to Summerville was printed in the January 28 issue of "CNC Chronicle."

The Faculty Advisory Committee recommended that the reorganization should be put off for at least a year for three reasons. First, financially "this does not appear to be the time to create a new administrative position." Second, distribution requirements are being examined, and "a model with several schools could incorporate a more logical alignment of departments" after the decision to change or not change the requirements has been made. Third, "no problems with the continuation of the status quo have been articulated from those recipients of administrative services."

If the reorganization occurs this Fall, the FAC recommends that "academic considerations" be the "foremost criterion." Other recommendations include the following: "The search should be local," the selection of deans "should be made with the fullest possible participation of faculty members from the

(Continued on p. 8)

Our slips are showing

There was a mistake in last week's article on the new French textbooks. Intermediate French classes are not numbered 103 and 104. They are 201 and 202.

.....

In the article on the ROTC classes held on campus, Captain Gary Gault was incorrectly identified as a major, and he is with the Army National Guard, not the Reserve Oregon Army and National Guard as was stated in the article. Major Benthram Costigan is the head of the detachment.

.....

The results of the noon petitions sponsored by the Student Association were reversed in last week's article. The general classes would still be offered during the noon hour as well as during other hours of the day, thus giving students a choice as to whether they wish to have a noon class.

The specialized classes, such as those that are offered at one time during the semester and courses required for graduation, will not be offered at noon.

Vote for Homecoming Queen

Campus Closeups

Help has arrived

Me is here!
No, that's not a grammatical error. Me really is here.

Yes, it's Me and I am ready and waiting for exciting, dull, serious, silly, exotic, strange, normal, and all-but nuts questions.

If you have a question, need advice, want to voice your opinion, or just waste time, write to me. Write Me a letter, serious or silly, and I'll give you an answer be it helpful or hilarious. Pick up a pen, pencil, or crayon and drop Me a line.

Address it "Dear Me . . ." c/o The Captain's Log.

IVCF

Proverbs 3:6 tells us to acknowledge the Lord in everything that we do. Inter-Varsity Christian Fellowship continues to grow as more and more students acknowledge God in their college life.

We are excited to see the number of students who are attending I-V for the first time. We still have room for you, come join the fun!

IVCF meets each Wednesday at noon in CC233. If you're unable to attend but you are interested in getting to know some of the Christians on this campus, call Bryan Price at 877-0687 and ask about our small-group home Bible studies. We presently have two which meet on Monday and Thursday nights. We look forward to meeting you.

Photography Club

The next meeting of the Photography Club will be Monday, February 14 in CC233. If you had experience or just need to know something about the world of photography please attend. For more information, please contact Wilnette Edwards at 247-0278. We can plan activities if you wish.

Psych. Club

Flash!! Coffee is back at Wingfield Hall, and we've got it all. Doughnuts, hot cocoa, tea, even decaffeinated.

Regular meetings have resumed and are being held on Thursdays at 12:15 p.m. in W110. You need not be a psychology major in order to participate, so anyone who is interested drop by and check us out.

We are exploring the possibility of having night meetings for those students unable to attend during the day.

Dr. Herrman will speak to the club on February 10 at 12:15 in W110. The topic will be "Update on the Psychology Department at CNC."

Govt. Club

There will be a Government Club meeting on Friday, February 11 in the Admiralty room in the Campus Center. Meetings are every Friday at 1 p.m.

It is imperative if you are a political science major or interested that you attend. The club's intention is to enlighten and inform on political affairs.

For further information on the club, please contact Wilnette Edwards at 247-0278 or one of the political science professors.

Backgammon

Sign-up for Intramural Backgammon began on January 31 and will close on February 16. There are two sign-up sheets, with the rules attached, one on the Intramural Board in the Campus Center and the others in the Gym outside the Intramural Office.

There is a sign-up sheet for the girls' tournament and a separate one for the guys' tournament.

Play will begin on February 21 and continue through February 25. The brackets, telling you your opponent, will be located on the Intramural Board in the Campus Center and also in the gym outside the Intramural Office.

Backgammon games can be played in the Pub, using their sets, or you may use your own.

There will be a meeting for those who have signed up to play in the tournament on Thursday, February 17 at 12:15 p.m. outside the Intramural Office.

If you have any questions or would like more information, contact Cherie Kautz at 599-7054 on Thursdays, 1-6 p.m. or leave a message in the Intramural Office.

Economics society

The Sigma Chapter of Omicron Delta Epsilon International Economics Honorary Economics Society is representing a lecture on "Current Issues of Today's Monetary Policy" Saturday, February 12, 1983, 8 p.m. in the cafeteria.

Dr. William Cullinson, director of Economic Research, Federal Reserve Bank of Richmond will present this lecture. Everyone is welcome.

Prayer meeting

"One day Jesus was praying in a certain place. When he finished, one of his disciples said to him, 'Lord, teach us to pray . . .'"

Once again this semester, a weekly prayer meeting has been formed on campus. A close relationship with God begins with prayer.

Come and learn that Jesus taught about prayer, and how you can improve your prayer life. These meetings are led by Marty Buoncristiani, a Christian student here at CNC.

Meetings are held each Thursday from 10 a.m. - 11 a.m. in CC214. Please come.

Eight teams begin volleyball season

Intramural Volleyball met on Sunday, January 30 to begin the season. This Sunday meeting consisted of the players and officials meeting with each other and learning the rules and regulations of the game and scrimmaging.

This year there are eight teams signed up to play. They are Alumni, ETT, IVCF, Gonads, OTHG's, The I Don't Knows, Sailing Club, and Xenith.

Play will begin on February 6 and continue through March 6, from 10 a.m. til 3 p.m. Tournament play will be held on March 13 from 10 a.m. till completion. T-shirts will be given to the first place team of the tournament.

Placement Center amends recruiting schedule

There have been several changes in the recruiting schedule for the spring semester at Christopher Newport.

IBM's representative has decided that he will interview only those seniors who are majoring in computer science, information science or mathematics and who are interested in a sales career with IBM. He will not be interviewing seniors majoring in finance or accounting as was previously reported.

The Newport News Shipbuilding has changed its interview date from Monday, March 7, to Wednesday, March 16.

Two new recruiters have been added to the schedule: Tuesday, March 15 - University of Richmond Graduate School of Accounting; Wednesday, May 18 - Hampton Public Schools.

Please check *The Captain's Log* for any other changes or additions to the recruiting schedule or stop by the Office of Career Planning and Placement, CC208, between 8:30 a.m. to 4:30 p.m. for further information.

Entertainment

Guys and Dolls "multi-set" a challenging assignment

by Ann Catherine Braxton

As the lights illuminate the proscenium, the set of *Guys and Dolls* transports the audience to the colorful world of 1930's New York City, a world of theatres, race tracks, and night clubs peopled by entertainers, small-time crooks, and mission workers.

Scene designer Skelly Warren faces one of the most challenging assignments of his career with the set of *Guys and Dolls*, a set that must be a multi-dimensional, brilliant, and vivid recreation of the story's locale.

Professor Warren notes the differences in the sets of the season opener *Antigone* and the 1981-82 season opener *You're A Good Man, Charlie Brown*. "*Antigone* was a one-set show. This (*Guys and Dolls*) is multi-set."

And while there may be a similarity between the sets of *Charlie Brown* and *Guys and Dolls*, Warren points out "*Charlie Brown* was a fantasy, and there was no locale.

Damon Runyon's stories take place in New York. It is almost a period piece. There must be specificity. It is a world of 25¢ hoodlums and gamblers. It must have the feeling of a big city. In a night club scene, we're looking for the portrayal of a sleazy second-rate establishment trying to be first-rate."

He describes the nature of musical comedy as reflected in the set. "You have to adjust all of your creative juices to come up with something that is evocative of musical comedy.

Musical comedy requires a certain amount of spectacle. I'm trying to put as much on the stage to create as much spectacle as possible.

"The scenery consists of a false proscenium and a drop, and the set is all painted with perspective drops and flats to get as much spectacle as we can."

Color is very essential to the set, Warren stresses. "It is a fable and supposedly charming, so you would naturally have bright colors. Even the sewer is beautiful and multi-colored rather than dingy and dark."

Warren states that it is the duty of the scenery designer to work closely with the director. "We start out with 'thumb-nail' sketches or a rough idea of what we think the set should be like. The director approves of them by matching these with his concepts.

"Then we make more detailed drawings and possibly a model which the director must approve. Then we make scale models of the painting, begin construction, make any clarifications, build the scenery, and then paint it."

As a part of their assignments for Warren's theatre courses, he requires his students to put in a certain number of hours each week to apply the theory they have learned in class in set construction.

"They must work with the show. Some work with lights, some with costumes, and some run scenery on and off stage. (Theatre

majors) Lori (Paschall) and Kraig (Seichrist) teach the students practical application with tools. We don't just leave them alone."

The uniqueness of *Guys and Dolls* lies not only in the size of the musical but also in the characterization of its set. "We've always had lots of suggestive settings", Warren explains, "but we've never had a set that had a specific place. You have to be aware that we are in the big city."

Va. Beach Municipal Center Art Exhibit displays Yerby works

Margaret Yerby, the featured artist in the February Municipal Center Art Show, is one example why Ernest Hemingway termed Paris "a moveable feast."

Yerby is exhibiting 15 oil and acrylic paintings in the show sponsored by the Virginia Beach Arts Center. The scene from Paris is a rendition of the Madeline Cathedral on the Rue Royale.

Yerby spent a year in the City of Light in 1955 where she studied at the Louvre - the national museum of art. Today, she paints scenes of the French capital from memories.

Memories of her travels are also evident in "Bavarian Village," an acrylic work of a riverside street in a German mill town lined with timbered houses. "Premier Performance," an oil painting, portrays a youthful ballerina after her first stage appearance, another memory.

Yerby also studied art at the Harepaution

Studios in Tehran, Iran and the McEvoy School of Art in Maryland. Her work has been exhibited in the Boardwalk Art Show for the past 12 years and the Neptune Festival Art Show and the Hilltop Art Show every year.

The Municipal Center Art Show is free and open to the public. The monthly show is located in the second floor corridor of the City Administration Building at Courthouse Drive and Northland Road, open Mondays through Fridays from 9 a.m. to 5 p.m. Call 425-0000 for additional information.

Spring Thing '83 set for May 21

Spring Thing '83 will be held on Saturday, May 21 in downtown Newport News from 9 a.m. until 7 p.m.

Applications are now being taken for artists, craftsmen, and vendors' booths. Food concession contacts will be mailed upon request by contacting Kathy Harrell, Special Events coordinator, Newport News Parks and Recreation, 2400 Washington Avenue, at 247-8451.

All traditional Spring Thing activities will be included in the one day event - the 10 kilometer Run for the Arts, parade, racquetball, golf and tennis tournaments, and three entertainment stages. Applications will be taken for athletic events beginning March 31.

Interested performing groups should contact Kathy Harrell at 247-8451.

CNC Lady Captains upset 2nd ranked Norfolk State

by David M. Bean

The last time anyone read this column, Christopher Newport College's Lady Captains had just come off two bad losses and were faced with the fact of having to host the second ranked team in the nation in Division II, Norfolk State. Things have a way of changing, and CNC changed fortunes by shocking the Lady Spartans and using the win to propel them to defeat two conference rivals over the weekend.

Coming off the humiliating defeats at the hands of UNC-Greensboro and Virginia Wesleyan College, not too many people thought this game would even be close. This would prove to be one of the best played games ever held in Ratcliffe Gym.

For the opening two and a half minutes, there was no score as both sides tested the others defense. NS took advantage of a Lady Captains' defensive error and drew the first blood. Soon they had the score up to 6-0 until Cindy Nice pumped in two. Shortly after that, Leanne Eyler and Vicky Gunn got the CNC offense on track to pull within two, 10-8.

Darlene Harmon tied it up at 10 and Benitta Coker gave the Lady Captains their first lead of the night 12-10.

From there, CNC's offense took over and used points from all of the starting five players to give them a 40-32 lead at the half. It was one of the best played team games so far this season.

The second half opened with Benitta Coker pumping in two points for a ten point CNC lead. Eyler continued to pace the CNC offense, directing traffic here, setting up a shot there, being almost everywhere.

Despite receiving a bloody nose at the start of the second half, Gunn returned to the game and began getting her "downtown" shot in the hoop for several points. At the half-way mark of the period, CNC was up by 12, 57-45; but NS kept up the pressure and started to cut the CNC lead.

One cause for this was the fact the Lady Captains were not moving as well in the offensive zone this half as they were in the first. This resulted in the lead going from 12 to 7 with 6:47 left. That would become one point with 2:13 as the score was 60-59 CNC.

"The girls just had a certain type of attitude when they came in today and when I saw it, I just knew we were going to win."

CNC managed to get the ball back, and it was Eyler who ran the clock out, giving the Lady Captains a 63-62 upset over Norfolk State.

Leading scorers for the Lady Captains were Nice with 17 points, Eyler with 16, Harmon

with 11, and Coker with 10. Norfolk State's Norma Knight led all scorers with 24 points.

Both Coker and Eyler missed foul shots, and NS grabbed at the chance to tie the game at 61-61. NS then used a free throw to put them up 62-61 with 1:00 left. It stayed that way until Eyler brought the ball up the floor, split the NS defense and hit a layup with 23 seconds left.

CNC coach Walthall was overjoyed at her team's performance. "We needed this game" she said. "It was, by far, our best game - especially on defense. We haven't been able to put out like that since Christmas - and it was the HI game."

"The girls just had a certain type of attitude when they came in today and when I saw it, I just knew we were going to win."

The only problem CNC is having, regarding the opposition, is taking the Division III seriously. Walthall spoke on that. "We haven't taken the Division III teams seriously and we have to. We have to work just as hard against them as we do against the other teams."

As the weekend rolled around, the Lady Captains traveled west to take on Methodist College on Friday night, February 4 and St. Andrews on Saturday, February 5.

Although there were no details available, CNC did defeat Methodist and then met St. Andrews. When the smoke was cleared, CNC had notched up their sixth conference win by defeating St. Andrews 73-72.

Leanne Eyler led all scorers with 25 points. Vicky Gunn had 20 and Darlene Harmon put in 12. Eva Pittman led St. Andrews with 23 points. The Lady Captains are 13-7 overall with a 6-3 conference record.

Captains lose weekend games

by Lauri VanNewkirk

Traveling on the road this past weekend was made bleak by the agony of defeat. Friday, February 4, the Captains lost a close one to Methodist College, 69-67. The Captains led at halftime by the score of 34-33, only to be edged out in the final tally. Bobby Griffin led all scorers with 24, and Pete Strayhorn added another 16.

Saturday, February 5, the Captains were hosted by Dixie Conference leader St. Andrews, but the Knights defeated the men 75-57.

Vince Eure, junior forward, was taken out of the game during the second half with his fourth foul. He later returned with eight minutes remaining only to be ousted with his fifth foul. Eure finished the game with 12 points and nine rebounds.

This puts the Captains at 5-5 in the Dixie Conference and 6-13 overall.

Track to open soon

by Scott Helm

After the soccer field, the fencing, and the infield have met state specifications and are approved, the track and field complex behind Ratcliffe Gym will be officially opened. The official opening of the complex will be with a dedication ceremony this spring.

Currently, only the track team is allowed to use track until reseeding of the infield had been completed. Until then the discus and shot put facilities on the infield cannot be used.

Love Notes

To Mattie, Happy Valentine's Day. Your Secret Pal.

Little As, Be mine for Valentine's. I love you and miss you! The Controller.

Happy Valentine's Day to all the men of Sigma Pi. Little Sis, Gina XXXX0000.

Happy Valentine's Day Marinda. Love ya bunches, Karl.

Happy Valentine's Day, Anne Catherine Braxton. A friend.

To the girl in the library who loves dirty jokes, I have got to see you. The author of the book.

Dad, Even though you never tell us, we know we are still #1. Happy Valentine's Day! Love the Daughters.

CMH, I'd like to be with you on a slow boat to China - because with you, I'm happy. Happy Valentine's Day. Love, KAH.

Mickey, Your are still my favorite slack rap, and I'm glad to have you home on the range. Love, Dizzy.

To the Halston Man, Letting go is just another way of saying that I'll always love you so. We will always be friends. From the Halston Lady. XXX000.

Fats, Happy "Fat" Valentine's Day - From your fat friends.

Bits, I wub you. Bunka, Bunka, Kibbles.

Hey Becky, Make me late for breakfast! Happy Valentine's Day, Girl.

To Squirrel, the girl with the boyish figure. Happy "Punk" Valentine's Day! Watch out for squirrel bait. Love, Diz and Scruff.

Kibbles, Wanna get bit? Bits

Cory, I really love you lots, I think you are the tops. For the guy that really likes the Stones. I want to jump your bones. Signed, Brown Sugar.

Slack, You are not too bad. I've got a new Stones album and a heater in my room. Happy Valentine's Day. Love, Diz.

Sorry dog ski bunny - Some slopes are rough, others are just tough, you really look neat, with skiis strapped to your feet, your face all a glow with the sun's rays - Happy Valentine's Day.

Diz, My heater works now and I have a new Stones tape. Let's check it out soon. Signed, TUB.

Dear Bob Jones, You are so cute and cuddly that if CNC manufactured toys, a doll that looks like you would sell a million copies. Love, Your Secret Admirer.

To E4, Remember, no woman is worth it, except me! I adore you! Your secret sweetheart.

I didn't spare any expense this time, Penny. Happy Valentine's Day. Love, KRH. XX00.

Applications are now being accepted
for the position

Editor-in-Chief of The Captain's Log

Letters of application outlining
experience and goals should be
submitted to John McCaughey,
director of Student Life, CC238.

**Deadline for application is
Friday, February 18.**

Applicants will be notified as to their interview date.

Position is salaried.

Opinion

Students air their views on purchase of presidential house

Michelle Savage
Sophomore
Business Major

The college is too small to justify such a house. The money could have been spent more wisely. The school is expanding, and the money is needed elsewhere.

David Lenz
Freshman
Music Major

I think it would be charitable for the President as well as the school's reputation. It also helps in the growth of Christopher Newport. The school deserves a stronger reputation.

Jeanette Spreemaann
Senior
Urban Planning Major

I think it is terrible. It is ridiculous for the president to have a house and the school having no dorms. I am curious whose idea it was to buy the house in the first place?

Michael Blanchard
Freshman
Undecided

I feel that we should buy our president a house, but not a two hundred thousand dollar one.

Carrie Jones
Freshman
Undecided

It was a worthwhile investment. It will benefit everyone in the school. This is one step in the expansion of Christopher Newport.

Roy Preston
Junior
Business Management

It is a bit much for a house. He (President Anderson) should be trying to help cut spending.

Angela Cook
Accounting Major
They should have used the money for dorms. Buying the house was a luxury, not a necessity.

Debbi Lauffenburger
Unclassified
Nursing
I doubt it would help the school.

R. J. Freedman
Senior
Computer Science

We're a non-residential college, and we don't need such a house. It is totally inappropriate.

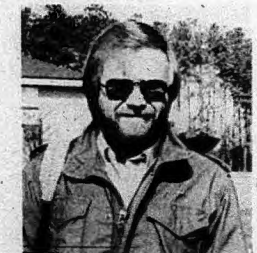

Jeff Barley
Junior
Business Management Major

As long as he invites everyone over, it is O.K. It is probably too much money on that house.

Stan Vinson
Sophomore
Pre-Engineering Major

His salary is enough for him to live well. Let's enhance the campus for all the students instead of one single administration member. It was definitely a bad decision.

Chip Kessler
M.I.S. Major

I feel that the money could have been spent better. We should have bought equipment to improve the computer area.

Letters to the Editor

Student feels cheated

Dear Editor,
I would like to know how the Board of Visitors and the Administration can manage to scrape together \$219,000 to buy a house for the School's President and, at the same time, cancel required classes because of a lack of funds.

Many students returned to school this semester to find some of the classes they needed for graduation had been cancelled. The Administration did not seem to be too upset about the situation. As a matter of fact, several solutions were offered.

One solution was to suddenly change the existing requirements for graduation. That is, to swap one required course for an independent study. Does the Administration really think that the average student will learn as much from an independent study as from a structured class?

A second solution was to offer another class in place of the required class, one that would draw a larger crowd, yet had nothing to do with the subject matter of the cancelled class. This was the accepted solution.

Since becoming a student at CNC, I was under the impression that if a class is designated as required it must be because it will be

a valuable component of the student's education. It seems to me that substitution does not seem to be the answer and that students are settling for less.

In a similar situation, a class had been cancelled, but the Administration stated they would reinstate the class if the instructor would teach it as a topics course. That merely means about a \$6,000 drop in the instructor's annual salary. The class is being taught.

One student interviewed for the "Captain's Log" stated that having Presidential housing would give the College "a little bit of prestige, add a bit of class". I didn't realize that a school with as many material values as it can manage to acquire meant it was considered to be prestigious and classy. I had always thought a school with prestige was one that gave its students a solid education and sent them out into the working world feeling somewhat prepared.

When I began school at CNC, I felt good about the education I would be receiving here. Now, I'm not so sure. I tend to feel cheated somehow. It just seems to be a shame that the Board of Visitors and the Administration would rather see this school built up physically instead of academically.

Name withheld by request

From Our Readers returns

In lieu of the Opinion Page in the February 24 issue, *The Captain's Log* will feature again this semester the creative talents of our student body. If you have an essay, opinion piece, short story, any poetry, drawings or photographs that you would like to have published, please submit the material to the Editor in CC223.

Final deadline for all copy is noon, Friday, February 18. Remember that all copy, no matter how little, is to be typed and double-spaced before it is submitted.

Room temperatures

(Continued from p. 1)

ing to CNC Security. In case of an alarm, someone from Security would notify one of the computer operators.

Only certain people are permitted to operate the computer. The two operators, both given special training in Richmond, have secret passwords known only to themselves and the computer. Nothing can be changed in the computer without first typing in the password.

Records of everything done with the computer are kept on the printer. Security gets copies of all records, and the system is also monitored from Richmond.

Mr. Roberts adds, "Human error is almost eliminated for the simple reason that the computer will not recognize an error."

The companies that sell this system continue to offer their services by sending updated revisions twice a year or technicians if necessary. The computer hardware is made by Digital Equipment Corporation, and the software is supplied by MCC Powers. The software is the actual brains of the computer.

Many large businesses and colleges use this system. The United Nations Building in New York is one example. Recently, representatives from William and Mary have been evaluating the EMC System for their college.

Due to a lack of funds, the system could not

be installed in all buildings. The Administration Building, the Service Building and the new Science Building still operate on a time-clock system. However, some type of expansion is expected.

The system may someday control lights, door alarms and smoke alarms. Mr. Roberts hopes to see these additions occur but admits, "It's got a heck of a lot more potential than the college has got money for."

LASE

(Continued from p. 1)

relevant school," "evaluation of the deans should provide for the fullest possible participation of relevant faculty members in a process guaranteeing anonymity," and "annual evaluations should go directly to the vice president for Academic Affairs for subsequent review by the evaluate."

President Anderson will present a formal resolution concerning the reorganization of the School of LASE to the Board of Visitors at the Board meeting February 24.

Budget cut

(Continued from p. 1)

The college has also set a four-tiered priority level for fund expenditures. The priorities are as follows: instruction, student admission and record keeping, plant maintenance, and mandatory support activities. Currently a special appeal is being made to the General Assembly for additional fund support.

If the college is faced with severe budget problems it will have to find alternatives to make ends meet. If the appeal is not granted, tuition may be increased, the Counseling and Career Placement Center will be reduced and maybe eliminated, and mid-term graduation will be eliminated. Plus faculty workloads will be increased along with the elimination of the internal auditing function.

The payroll function will be reorganized, participation in the Tidewater Consortium will be reduced, plus the procurement of library books and campus maintenance will be reduced.

The memorandum also stated that in an extreme case of monetary deficiency the College has agreed to reduce the operations of up to four academic departments.

The cuts and reductions on campus are for an extreme case and nothing will be definite until the General Assembly is out of session.

Classifieds

For Sale: Comic books. Mostly DC and Marvel science fiction and fantasy titles from 1979 on. Fair to mint condition. Any reasonable offer accepted. Call 596-8434.

For Sale: Record albums. Mostly Rock, Pop, and Classical. Good condition. Call 596-8434.
