Virginia State Board of Education Visitation

On March 10-12, a committee authorized by the Virginia State Board of Education to evaluate the CNC Teacher Education Programs for "approved program status" will visit the campus. Members of the eight-person committee will be meeting with members of the Faculty, Administration, and Student Body and will be visiting facilities to validate our self study and evaluate our programs against the standards adopted by the State Board of Education.

With the approved program approach to teacher preparation, institutions of higher learning have an increased responsibility for controlling the quality of the candidates entering and exiting teacher preparation programs and for defining the total academic program through which teachers are prepared. Attainment of "approved status" would have significance for our graduates in the areas of certification reciprocity with other states and ease of obtaining Virginia Teaching credentials.

E.A. Daly, Chairman, Department of
Education

COMMITTEE REPORTS

Faculty Advisory Committee

The FAC, in response to a request by the CNC Student Association, will move the following at the Friday, March 14, 1980 Faculty Meeting:

that a student member of the Student Association, designated annually for the academic year and appointed by the Student Association Executive Council, be invited to attend the meetings of the CNC Faculty. This student will be a non-voting member and whenever matters of a personnel nature are considered by the Faculty, the Faculty can vote to go into executive session during which time non-faculty attendees would have to absent themselves from the meeting.

Rationale: the Student Government Executive Council requested this and according to Vice President Edwards the "Sunshine Law" has opened meetings, including Faculty meetings, to the general public. The FAC feels the Faculty would welcome this student to strengthen faculty-student relations.
